CENTER FOR UFO STUDIES

FEBRUARY-MARCH 1984—VOLUME 5, NUMBER 1

CEII Case In Juchen, West Germany

From Hans-Werner Peiniger, Director of G.E.P. (Gemeinschaft zur Erforschung unbekannter Phänomene e.V.), CUFOS has received an English translation of an interesting Close Encounter of the Second Kind which is reported to have occurred during last May near the west middle border of West Germany in the community of Juchen. We are grateful to Mr. Peiniger for sending it, to Rudiger Nazar for the English translation for editing, and to the witness, Jurgen R., for sharing his experience with G.E.P.

TYPE: CEII
DATE: May 24, 1983
TIME: 6:00 to 6:30 PM MEZ
DURATION: 10 minutes, approx.
WITNESSES: one
PLACE: Juchen, by Grevenbroich, W. Germany

Jurgen R., a 14-year-old grammar school boy, was standing behind the house in which his parents were living. It was dusk. He was about 30 meters from the house at the edge of a field and had his walkie-talkie (short-range, battery-powered, two-way, portable radio) with him.

Suddenly, he observed a red and relatively round-shaped object. It came shooting down out of the sky and came to a stop, hovering, above a nearby electric-power-transmission line. After a short time, it began to eject a pyramid-shaped array of colored light rays toward the ground. A few minutes later, the pyramid of light rays slowly disappeared. However, it disappeared from the round object downward to the ground. Finally, the object sped away into the sky toward its point of origin. During the sighting, there was no contact with the other CB (walkie-talkie) partners. The CB-radio (27005-27135 kHz) was disturbed by hum-like sounds.

Summary of observation

Based upon observation estimates, it

Superimposed on this photograph of the sighting location is a sketch of the pyramid-shaped "ray-field" and the spherical red object reportedly observed for approximately ten minutes by 14-year-old Jurgen R., near Juchen, West Germany on May 24, 1983.

subtended between 3 and 2 degrees of arc as the red ball entered the clouds. It was between orange-red and brownish-red, according to the Michel-colour-guide. The contour of the object could not be recognized, other than that shown in the accompanying sketches. Its illumination was spontaneous and the object appeared to be "glittering." No sounds were heard from the object. Its motion was constant before and after the hovering maneuver and was very fast, faster than a jet plane.

The sketch of the city of Juchen shows the position of the witness (A), the azimuth at the beginning of the observation (B), when the object was standing still (C), at the end of the observation (D), the location of the electric power lines (E) and the position of the ray-pyramid (dark circle). The "ray-field" was in the shape of a pyramid, all red in color, but with a lighter red inside than on the edges of the pyramid. Trees and the ground beyond and behind the ray-field could be seen through the structure.

The duration of the event has been broken down as follows: Building up time of the ray-field (about 5 to 10 seconds); observation of the ray-field in complete form (about 1 to 2 minutes); destruction of the ray-field (7 to 10 minutes). After the ray-field disappeared, the ground was still "glimmering" for another 10 seconds. The object was out of sight in the clouds within 20 to 30 seconds.

It has been determined that the cloud altitude at the time of the sighting was approximately 200 to 300 meters. The distance to the ray-field from the observer was approximately 350 meters. Therefore, the size of the object can be calculated to be between 15 meters (given a 200 meter cloud elevation) and 23 meters (given a 300 meter cloud elevation). The diameter of the object as observed while hovering near the power lines would have been roughly 11 meters and the altitude from the hovering ball of light to the ground would have been 68 meters.

Letters

Editor:

My husband and I saw something in the sky over Baltimore's Druid Hill Park about 2 years ago. The cab drivers from the Sun Cab Co. also saw it; one observed it through binoculars.

It was about 7 o'clock in the evening. My husband had stopped at the Cab Co. for a paycheck. He had been a part-time driver for the company. The other drivers were looking up at the sky. There were seven silver discs in the sky, all in a straight line. The cab driver who had the binoculars said they each had a red line around the center and they looked like saucers turned upside down. As we watched, they went into several different formations. I will try to draw them:

After awhile, we saw a plane go up and fly around them. We observed them for about ten minutes and then they darted away very, very fast, one by one. They were a silvery metallic (color).

John P. Timmerman, Editor

J. Allen Hynek, PhD., Scientific Director

(continued from page 1, column 3)

The witness declares that he has never heard anything about UFO sightings and hasn't read any publications on the subject. The investigation team states that they believe the witness' observations and report to be authentic.

GEP does not believe it could have been a helicopter, as there were no sounds of a motor reported. Also, ball-lighting would be eliminated, given the reported absence of any storm activity in the atmosphere. GEP ranks the witness' reliability index at 75%.

Copies of the original report in German in the No. 6, 1983 issue of "Journal for UFO-Forschung" may be obtained by writing to GEP, P. O. Box 2361, D-5880 Ludenscheid, West Germany. □

Jürgen R.

Letters — continued

Dear Mr. Timmerman:

In your publication there was an inaccurate coverage about this organization. Will you be kind enough to publish a statement of ours so that the general public may have a correct understanding of our work and purpose.

Please send over a copy of the published version of our statement.

The Statement

1. The China UFO Research Organization (CURO) has held its national convention on August 4th to August 12th 1983 in Shanghai and has elected Professor Liang Rong Lin as its Chairman.
2. Our research centre is based at JINAN University, the address is:
CURO
Professor Liang Rong Lin
Physics Department
JINAN University
Guangzhou, China
3. This organization is willing to establish direct link with both UFO research societies and UFO experts alike.
4. "The Journal of UFO Research" (Chinese) is not our specialized journal and has no link whatsoever with us.

Professor Liang Rong Lin
Guangzhou, China

(Ed Note: We hope that the information given in an earlier issue of the ASSOCIATE NEWSLETTER did not confuse or inconvenience any correspondents with CURO).

Dear John:

The phenomena in Hessdalen (Norway; see INTERNATIONAL UFO REPORTER, Vol. 8, #6) have taken on again, but now at a somewhat less intensive level. The project team is being organized and I hope that there will be enough substantial data gathered before February 4th, when there will be convened a meeting in Stockholm, so that we can decide if and when an international conference can be held in Scandinavia during 1984.

Bertil Kuhlemann
Enebybert, Sweden

Dear Sir:

I have just read my copy of your December/January issue (ASSOCIATE NEWSLETTER). I find it extremely interesting and well-produced, but I beg you to have your future issues printed in a stronger, blacker ink. The present ink is gray and difficult to read.

J. Bryan, III, Col. USAF (Ret.)
Former President, NICAP

(Ed. Note: Voila! Darker ink.)

Transcript of Ed Murrow- Kenneth Arnold Telephone Conversation

Many of our readers will remember Edward R. Murrow, the popular, cigarette-smoking news commentator of the 1940's and 1950's who gave the news a dramatic touch in his own distinctive style. Almost three years after the famous June 24, 1947 sighting in the Cascades of the state of Washington, Mr. Murrow engaged the pilot/witness Kenneth Arnold in a conversation about his historic experience.

Portions of that conversation are reproduced here in an exact transcript of the broadcast as it was heard nationwide on the evening of April 7, 1950. Some of you may have been listening to that broadcast. For you and for those who are somewhat younger, here it is, "the way it was."

"ARNOLD: It was while I was searching for this crash that I noticed a terrific blue flash pass the nose of my airplane. I noticed that the flash came from a train of very peculiar-looking objects that were rapidly approaching Mt. Rainier at about 107 degrees. This train of objects were 9 in number. I assumed at the time they were a new formation or a new type of jet, though I was baffled by the fact that they did not have any tails. They passed almost directly in front of me, but at a distance of about 23 miles, which is not very great in the air. I judged their wingspan to be at least 100 feet across. Their sighing did not particularly disturb me at the time, except that I had never seen planes of the type.

MURROW: Mr. Arnold, after landing, made a routine report of what he had seen to a Civil Aeronautics Administration representative, and promptly forgot the matter, until the wheels of publicity began to turn. The floodgates opened.

ARNOLD: I never could understand at that time why the world got so upset about 9 disks, as these things didn't seem to be a menace. I believed that they had something to do with our Army and Air Force.

MURROW: On three different occasions, Mr. Arnold was questioned by military intelligence. They expressed doubt as to the accuracy of some of his reported observations.

ARNOLD: That's right. Now of course some of the reports they did take from newspapers which did not quote me

properly. Now, when I told the press, they misquoted me, and in the excitement of it all, one newspaper and another on got it as ensnarled up that nobody knew just exactly what they were talking about, I guess.

MURROW: Here's how the name "flying saucer" was born.

ARNOLD: These objects more or less fluttered like they were, oh, I'd say, boats on very rough water or very rough air of some type, and when I described how they flew, I said that they flew like they take a saucer and throw it across the water. Most of the newspapers misunderstood and misquoted that too. They said that I said that they were saucer-like; I said that they flew in a saucer-like fashion.

MURROW: That was an historic misquote. While Mr. Arnold's original explanation has been forgotten, the term "flying saucer" has become a household word. Few people realize that Mr. Arnold has reported seeing these same strange objects in the sky on three other occasions. He says that some pilots in the northwest have reported seeing them on 8 separate occasions. We asked for his own personal opinion on the nature of what he and the others had seen.

ARNOLD: I don't know how best to explain that. I more or less have reserved an opinion as to what I think. Naturally, being a natural-born American, if it's not made by our science or our Army Air Forces, I am inclined to believe it's of an extra-terrestrial origin.

MURROW: Extra-terrestrial origin? You mean you think there's a possibility they may be coming out of space from other planet (sic)? I suppose that's pretty hard for people to take seriously.

ARNOLD: Well, I'll tell you this much—all the airline pilots, none of us have appreciated being laughed at. We made our reports essentially to begin with, because we thought that if our government didn't know what it was, it was only our duty to report it to our nation, and to our Air Force out of it (sic). I think it's something that is of concern to every person in the country, and I don't think it's anything for people to get hysterical about. That's just my frank opinion of it.

MURROW: So that's how it all began; that was the trigger action. Kenneth Arnold's story went scudding over the news wires. Radio and newspapers picked it up, and then within days the country broke out into a flood of flying saucer observations."

NOTE: all of the above commentaries by ARNOLD are verbatim beeperphone statements, whereas all MURROW remarks are not, but rather added later to connect the ARNOLD statement for the broadcast. □

Dear Sirs:

The answer is really simple when you narrow it all down. UFOs are demonic manifestations in various forms, not creatures from outerspace.

Jeffrey McGee

Nurnberg UFO Becomes IFO

As Kim Moller Hansen wrote recently to this CUFOS Editor, "I know your problem about publication of IFO photos. Some people in Denmark do not like our magazine UFO-NYT because we write about these IFO cases. These people call the magazine IFO-NYT!"

However, as Ms. Hansen knows very well, it would be irresponsible journalism to present cases which are currently unexplained and fail to publish the final explanation of the event. That would be a failure on our part to educate our readers regarding the unusual, but explainable, observations reported to us as UFOs.

Another such "explainable observation" was reported in the December/January issue of this periodical. We reported from the Foreign Press a news item which appeared in TRIERISCHER VOLKS-FREUND on Friday, April 19, 1983 a sighting which occurred near Nurnberg, West Germany a few days earlier. Several of our Associate readers brought to our attention that the case has been solved. (We thought sure we would hear from Mr. Klass, but he hasn't caught up with us, yet. If he does, we hope he will acknowledge this sequel article.)

First, we heard from one of our Michigan case investigators, Dr. Kenneth C. Schellhase, that the object had been reported as a research weather balloon in a German publication. Next, we heard from Hans-Werner Peiniger, Director of GEP (Gemeinschaft zur Erforschung unbekannter Phanomene e.V.) of Ludenscheid, West Germany, that "on grounds of our investigations, we can say: this object was a balloon in the stratosphere, presumably from Ost (East) Europe." Their investigation is detailed (in German) in their JOURNAL FUR UFO-FORSCHUNG, No. 3, 1983 and No. 4, 1983.

Finally, we received an interesting letter from Spanish Associate researcher Vicente-Juan Ballester Olmos of the Centro de Estudios Interplanetarios in Valencia, Spain. Sr. Ballester Olmos has published many articles on the UFO Phenomenon, including a recent publication by the Center for UFO Studies, entitled "A Catalogue of 200 Type-1 UFO Events in Spain and Portugal," available from our Evanston office (\$5.60 ppd.).

In his letter, he states, "I have to say with full certainty it is a large, high-altitude sounding balloon from the French CNES. Their shape is tetrahedral and they are launched from the CNES base of Aire-sur-l'Adour at South France. They used to be seen in Europe frequently and many photos have been obtained. I am attaching some photographs that you may reproduce in your journal."

Photo #1: Barcelona, Spain, May 14, 1968 (2020 hours)

Photo #2: Sainte-Genevieve, near Beauvois, France, May 8, 1967 (1700 hours) through a telescope of 210 mm (close-up)

Photos #3 and #4: Valladolid, Spain, September 16, 1965 (1730 hours) through a telescope. □

Short Reports

The temperature was very cold outside, but an overflow audience gave Dr. J. Allen Hynek a warm welcome at the U.S. Air Force Museum at Wright Patterson AFB near Dayton, Ohio on January 12th. 600 were expected, but 1,322 attended, breaking all records for attendance at a public lecture at the museum. TV monitors were set up in the foyers for the overflow crowd. An interesting series of nocturnal light photographs was reported by a local investigator and will be discussed in a future issue by CUFOS. (See photo this issue.)

Philip Klass has struck another blow against freedom of information. Prior to a recent conference, ~~Exploring Unexplained Phenomena II~~, sponsored by the University of Nebraska-Lincoln, Mr. Klass telephoned Russ Free, Conference Coordinator, Robert A. Mortenson, Director of Conferences and Institutes, and the Chancellor of the University of Nebraska, "vehemently complaining and demanding to know why a prestigious university would sponsor such a conference." (This item is quoted from the MUFON NEWSLETTER for December 13.) The following is a quote from a letter dated August 23, 1983 to Dr. John K. Yost, Assistant to the Chancellor, from Mr. Mortenson. "I talked at length with Mr. Philip Klass... (who was) quite adamant in his position regarding the credibility of the conference presenters. Further, Mr. Klass has a personal feeling that the nature of this conference seriously questions the integrity of the United States Government. He feels that there is no scientific evidence to support the claims of the presenters and indicated that these organizations, by publicly questioning the government, lend support to the Communist movement." This CUFOS Editor observes that Mr. Klass did not object to "the credibility of the conference presenters" when he was asked to be a member of the group of "presenters" on the NOVA program on UFOs, the Symposium of UFOs at the Smithsonian Institution and numerous other occasions at which Mr. Klass was a participant. Free speech seems to appeal to Mr. Klass only when he is free to speak.

As of our last previous issue of the ASSOCIATE NEWSLETTER, we finally (apparently) turned the light on in the Brazilian streetlamp photograph. However, we carelessly used alternatives stated by photograph analysts at Ground Saucer Watch as if they were our feelings. We said, "we have a streetlamp... or a hoax." This is an unfair pair of alternatives and was not intended to imply that our friends in South America were in any way involved in a hoax. □

UFO Hotline Reports

by Bob Gribble

The following is a flash report of incidents received at the National UFO Reporting Center, Seattle, Washington. All names of witnesses are on file at the Center. These are uninvestigated "flash" reports with no verification as of the date of this publication.

11/19/83—8:55 PM—Tompkins Cove, New York: A square-shaped object—estimated to be 40 feet in diameter and showing four brilliant white lights—was observed in a stationary position over high voltage electric transmission lines. The three witnesses were riding in a car and reported that the object followed their vehicle and approached to within 200 feet of their car. The witnesses fled to a neighbors house and observed the object until it moved away. From inside the house they could hear a humming sound. They had the object under observation for about six minutes.

12/7/83—9 PM—Near Cedarburg, Wisconsin: A car with a mother and two young children had just exited from the north-bound ramp on I-43 when they noticed a brilliant white light descending from the sky and approaching their vehicle. As the light got closer the driver stopped the car and got out for a better look. The light stopped when it was directly overhead at an estimated altitude of 200 feet. At that point the mother observed a huge object as large as four jet aircraft and shaped like a cooking Wok. Lighted openings were observed on what was described as the front end of the craft. The witness heard no sound as the craft hovered overhead for approximately six minutes. As the craft departed from the area all of the windows of her car fogged-up.

12/20/83—5:30 PM—Riverside, California: A small sphere—estimated to be six-to-eight inches in diameter and having pegs protruding from the surface—approached to within 20 feet of a car at windshield level. Constantly pulsating from red to silver, the bright ball maneuvered in front of the car for about 45 seconds before moving away. According to the driver, other cars were nearby and should have seen the object.

12/26/83—9:33 PM—Omaha, Nebraska: Several witnesses observed a square object descend between two buildings and stop at about the second story level. Estimated to be about three feet in diameter the object had an X-pattern of white lights on its underside. After viewing the object for several seconds at a distance estimated to be 500 feet, the object ascended at an angle and moved out of sight. No sound was heard.

ROBERT GRIBBLE, featured under PROFILE in the March 1982 INTERNATIONAL UFO REPORTER and retired after 30 years with the Seattle, Washington Fire Department, now devotes much of his time to his UFO REPORTING CENTER. Since 1947, he has invited and received thousands of sighting reports from throughout the country to his special phone number in Seattle, (206) 722-3000. With this issue of the ASSOCIATE NEWSLETTER, we begin a new feature, his UFO HOTLINE REPORTS, to better inform our Associates of current UFO report activity. Also, Mr. Gribble will be an integral part of a new national report investigation network being put into operation by the Center for UFO Studies. Details will appear in a forthcoming issue of this periodical.

12/27/83—10:30 PM—Indianapolis, Indiana: A small disc-shaped object with eight bright green lights descended from the sky and landed in an open field across the street from the home of the witness. After observing the object on the ground for about ten seconds the bright lights suddenly went out and the disc was no longer visible. Hoping to see the disc take off the woman continued to observe the area for an hour before retiring for the night. A second report was received from a woman driving in the same area during the same time period. She observed a fixed group of bright green lights descending from the sky and appear to land in a corn field.

1/4/84—10:40 PM—Crescent, Iowa: For about 60 seconds a stunned witness observed a bright light with a red glint make an angular high speed descent from high altitude and come to an instant stop. The light then shot across the sky at high speed making several 90-degree turns and then making another instant stop. Then the light went into a high speed vertical climb and faded into the clear night sky.

1/7/84—3:45 AM—Near Edenton, North Carolina: A father and his 15-year-old son watched in amazement as a meteor-like object maneuvered at high altitude and high speed making several 90-degree turns, loop-to-loops, up and down movements like the line pattern on an oscilloscope, instant reverse of direction and, instant stops and starts. The aerial display continued for 50 minutes against a clear sky.

1/8/84—Night—Framingham, Massachusetts: A narrow shaft of green light—beamed thru a bedroom window—was aimed into the right eye of the witness. The man said he could feel heat and pain in the eye at the time. During the estimated five minute duration of his experience he said he could hear a whirring sound and noticed the faint outline of a "being" outside the window, then everything suddenly vanished. His wife said she examined his right eye and that it was "all bloodshot" and that the left eye was very normal.

1/9/84—6:30 AM—Near Capron, Indiana: While driving his truck down a country road the witness observed a large

meteor-like object in a high speed vertical descent to the left of his vehicle. He lost sight of the object for a few seconds at tree level. Suddenly an object covered with white lights appeared at treetop level on the left side of his vehicle, maneuvered around behind the truck, then passed the truck on the right side and moved down the highway and out of sight. The driver described the object as looking like a football turned up on end, metallic-grey in color, about 150 feet tall and moving about 50 feet off the ground and about 100 feet from his vehicle. He could detect no sound and observed the object for about one minute.

1/9/84—8 PM—About 15 Miles North of Mojave, California: A Volkswagen camper drove under a submarine-shaped object while driving south of U.S. Highway 395. The driver and front seat passenger said the object had several red lights on the bottom, appeared to be stationary over the roadway at an altitude of about 100 feet and, that it had a diameter about twice as wide as the highway. The driver stopped the camper on the shoulder of the highway and the four passengers got out to watch the object as it moved away to the north. They could hear no sound. Later when they stopped for gas they talked to several people in four other cars who said they had also seen the object. We received two additional reports from witnesses who saw the object from two different vantage points.

1/9/84—10:30 PM—Hawthorne, New Jersey: While driving on Route 208 West the driver and passenger observed a strange object with lights descending and moving away from their car. After driving another 300 feet they spotted another object directly over the roadway and shaped like an inverted parabolic radar antenna. The car passed directly under the object which was moving slowly at an estimated altitude of 200 feet. When the driver moved the car to the side of the road and stopped, the object increased speed and moved away toward the first object which was about a mile away. He estimated the object to be about 75 feet in diameter and he said he could hear no sound coming from it. The duration of the incident was about five minutes. □

OUT OF THE PAST

(The following letter was received during 1983, but the sighting occurred during 1975, testifying once again to the delay which seems to be most common in the reporting of many interesting and often important sightings related to the UFO phenomenon.)

To Whom it May Concern:

I apologize for the inaccuracy of the dates of the following account. However, at the time, I knew of no organization such as yours. Tonight (March 19, 1983) I caught your address from a local radio station.

I am the Captain of a 75-foot fishing trawler. While fishing off the North Carolina coast in mid-summer of, I believe, 1975, I experienced an occurrence I would like to share with you.

My vessel, along with two others, was towing nets for shrimp one mile off the coast of Topsail, North Carolina, near Wilmington. The time was between 11:00 PM and 2:00 AM, when one of the other boats called me on the radio. We were in sight of each other, approximately one mile, when the other Captain called. He informed me of a large orange sphere above my boat and told me to go out and look.

I immediately stepped out of the wheelhouse and looked up. I saw nothing. My reply, when I stepped back inside, questioned how well my associate could see and also how long he had been without sleep. The Captain of the other vessel, E. N. Lockamy, assured me he saw something. While he was explaining more about it, he all of a sudden terminated his subject and said, "There it is, again."

I ran out, again, and saw nothing. The nature of Capt. Lockamy is stable, but commonly incorporated a practical joke. I weighed the evidence and decided to write this off as one of his practical jokes, a little something to break the monotony of the night. While all this was happening, we were only a few hundred yards apart.

While I was talking to Capt. Lockamy on the radio, doubting he ever saw anything, suddenly an orange sphere, approximately 30 feet in diameter and 20 feet in height, appeared above his boat. The sphere moved with his vessel, remaining 10 to 15 feet above his mast. I stopped my ridicule and told him to look above his boat. This time, it remained. Capt. Lockamy returned to the radio saying that is what was above me. It remained approximately 30 to 60 seconds, then seemed to move away rapidly for 20 to 30 feet, then instantly fled.

One other boat 10 miles away was listening to our entire radio conversation. While monitoring our conversation, he was observing our targets on his radar. He interrupted my conversation with Capt. Lockamy, saying that a large target was presented by the object. His, a 48 mile range radar, lost the object immediately upon its departure.

The object, in my opinion, had communication capability, as it disappeared and reappeared pending my radio conversation with Capt. Lockamy.

Enclosed is a photograph of my trawler. I hope this experience is of some benefit and may identify with some of your other findings.

Capt. Cordy Hieronymus
Wrightsville Beach, NC

To Whom it May Concern:

Upon viewing some of a late night interview on UFOs with a gentleman from the Center for UFO (Studies), an address was given for interested people to write to for further information. I did not see the entire interview, but I did hear a request for those who had UFO sightings to write to the Center.

At 22, I am a senior at UNC (when letter was written: Dec. 5, 1982). I was an Eagle Scout and currently serve as an assistant Scoutmaster for Troop 835. In high school, I was President of several organizations and served as the student body Vice President. I was voted best all-around student by my classmates. I give you these details into the background of my life in hopes of showing you that I am honest and trustworthy and not a phony. I have been interested in UFO movies, books and television specials ever since I saw one about 9 years ago. Often times I

have regretted not knowing how to notify the proper people. Now, many years later, I am grateful for this opportunity to tell my story.

My father was an R.O.T.C. instructor at West Charlotte Senior High School in Charlotte, N.C. On this particular evening, several high school drill teams were competing at the Charlotte Coliseum. My father, my best friend, Gary Reinhart (currently a senior at UNCC) and I attended this competition. When the evening's activities concluded, Gary and I began moving drill team equipment to my father's station wagon. My father requested that we remain by the car until he returned. To pass the time away, Gary and I found plastic spoons that we used as catapults for small pebbles. Gary shot a pebble into the air and looked skyward to follow its path. At this point, he noticed the strange object hovering noiselessly over the building. He quickly called my attention to the object. I looked up and saw a round, silver object with red lights arranged in a circle bordering the outer edge of the bottom surface. I would guess that the object was 40 feet in diameter and within 100 feet of the top of the dome-shaped coliseum. After a very short time, the object moved behind the building and out of our sight.

When my father returned, we told him what we had seen. I assume he felt it was boyish imagination. But, to Gary and me, it was very real. We do not speak of the incident because others might not believe it and it does not make an extremely interesting story. We both are convinced that what we saw was a UFO. I wanted to relay this information to you as was requested by your representative. If I can help in any way, please feel free to contact me.

John S. Dekemper
Charlotte, North Carolina □

How Much Do You Know About UFOs?

Thomas B. Burch is coordinator of Public Information Representatives for the Center for UFO Studies. The following questionnaire was produced by Mr. Burch several years ago as a means of determining a person's knowledge of the UFO subject. If you can answer these questions correctly, you have spent some time reading in this subject and are reasonably current on who is who and what was what. Test yourself and look for the answers in the next issue of the ASSOCIATE NEWSLETTER.

True or False

(Circle T for True, F for False)

1. A 1978 Gallup Poll found that 58% of the American population thought that UFOs are "real." T or F
2. It is frequently reported that animals react to the presence of UFOs before human witnesses do. T or F
3. In 1977 the "Washington Whispers" column of *U.S. News and World Report* said there would be "unsettling disclosures about UFOs by the Government before the end of the year." T or F
4. In Aurora, Texas, on April 17, 1897 a UFO reportedly struck a windmill and exploded, killing the UFO pilot. Recent investigations have proved this case to be a hoax. T or F
5. On December 5, 1945 five Navy torpedo bombers disappeared while flying over the Bermuda Triangle. The final radio transmission of this doomed flight allegedly included the warning: Don't come after me... They look like they are from outer space." No plausible explanation for this disappearance has ever been offered. T or F

6. One state in the U.S has never experienced any reported UFO sightings. T or F

7. There are no disagreements among UFO researchers about the value of hypnotic time-regression procedures in the investigation of UFO reports. T or F

8. In his book *Flying Saucers; A Modern Myth of Things Seen in the Skies* Sigmund Freud defined man's "Collective Unconscious" which he attributed as the cause of many UOF sightings. T or F

9. The term "flying saucer" was used by pilot Kenneth Arnold to describe nine unusual air vehicles he observed while flying near Mt. Rainier in Washington state. T or F

10. French mathematician and engineer Aime Michel is known for his theory of orthoteny which holds that UFO sightings occurring on the same day are frequently arranged along a straight line. T or F

11. Walter Andrus is the founder and director of the Aerial Phenomenon Research Organization (APRO). T or F

12. On the basis of data compiled since 1947, the UFO appears to be a global phenomenon. T or F

13. Law enforcement officials rarely report UFO sightings. T or F

14. Dr. Michael Persinger of Laurentian University, Canada, has theorized that many UFO reports are the product of "piezoelectric discharge." T or F

15. Cornell University space scientist Carl Sagan, who wrote the book *Communications with Extra-Terrestrial Intelligence*, objects to the U.S. government funding of UFO studies. T or F

Letters — continued

Dear Group Members:

In recent times, the level of UFO activity in many parts of the UK appears to have dropped off considerably. As a result, we are becoming aware of a danger to morale and a tendency for groups themselves to become inactive. This is a situation which we, at UFO International, are loathe to accept.

We would like to think that we can all help each other to keep up the momentum established in previous years when sightings were a fairly regular occurrence, by an informal exchange between groups as a means to pass on any useful/interesting information we have, to express points of view and to help one another know what is happening in our own 'neck of the woods' — be it sightings, newspaper articles, magazines, etc. We believe that by maintaining a good level of group interchange, we could be better prepared for the time when the frequency of sightings increases, as it surely must. Until then, we can all make the most of what little activity there is at present.

This is most definitely not an attempt on our part to create an organization, network or anything similar—it is simply that we wish to take a positive step towards remedying a situation which we can see evolving in these quiet times, and to help promote better inter-group relations and exchange information and ideas. We feel sure that this is something which could be of benefit to all of us.

If you feel you would like to correspond with us on this basis, or if you have views of your own to put forward, please write to us at the address below.

☐ Gift associate of _____ Kind with an extra gift of \$ _____ enclosed. Please send gift card signed: _____

☐ Nomination only. This is not a gift. Send information.

Critical Issues Of UFO Research

The above title was chosen for a paper presented at the 1983 conference of the Society for Scientific Exploration by Peter A. Sturrock, of Stanford University, and by David M. Jacobs, of Temple University. An abstract of their presentation follows:

"The prosecution of research into UFO reports poses many difficulties for individuals and organizations alike. Achievement of a full understanding of the origins and significance of these reports is, therefore, attendant on the successful resolution of a number of 'critical issues,' of which we consider the following to be the most significant:

(1) Coping with the notoriety of the subject. (2) Achieving objectivity in potentially polemical situations. (3) Dealing with the uncertainty in the reports. (4) Evaluation of the narrative content of reports. (6) The development of testable theories. (7) Extracting the maximum information from the small amount of available physical evidence. (8) Coping with the possibility of intrinsic intelligence. (9) Achieving an understanding of the problem of UFO reports within the larger context of science and the scientific study of anomalies. (10) Finding some way to attract the very best minds to the problem.

"Much work remains to be done in many different areas before we are likely to achieve a resolution of the problem posed by UFO reports." □

First WUA Director Appointments Listed

Word has been received from Dr. Willy Smith, CUFOS Coordinator for Spanish-Speaking Countries, that all but three of the nine Directors as specified for leadership of the newly developing World Ufological Association have been nominated for appointment to serve for the first term of office.

The areas for which Director appointments are yet to be confirmed are North America, South America and the Soviet Union. Those which have been appointed are as follows: Cynthia Hind (Africa), Ing. Sebastian Robiou (Central America and Caribbean), Lic. Vicente Juan Ballester Olmos (Europe), Hilary Evans (Europe), Paul Norman (Australia and New Zealand), and Dr. K. C. Chou (Asia).

The World Ufological Association is an organization of individuals, regardless of nationality or UFO group affiliation, who are highly-qualified by academic achievement in a recognized discipline pertaining to the UFO Phenomenon. In this respect, it differs from the International Committee for UFO Research (ICUR) which is organized on the basis of nations and from the North American UFO Federation (NAUFOF) which is being organized on the basis of UFO group representation in North America.

Appointments to the remaining three Directorates are expected to be made within the next several months. □

LEFT: This is one of 6 intriguing time exposures taken March 20, 1981 west of London, Ohio by long-time UFO investigator Larry Tillman. Details of the investigation will be in a future issue of the NEWSLETTER.

STOP!!! CHECK YOUR MAILING LABEL DATE

If the date shown on your label is 02/84, this is the anniversary of your last contribution to CUFOS and this is the last issue of A/N you will receive until your next contribution is received by CUFOS. Thank you very much for your continued support. Action now will continue your mailings uninterrupted.
