CENTER FOR UFO STUDIES

FEBRUARY 1981 — VOLUME 2 NUMBER 2

Australian Arrowhead Photograph Reveals Unseen Possible UFO

On Thursday afternoon at about 1600 hrs AEST, the 14th of September, 1972, David Owen was on his front patio which faces west. His home is located on Bateau Bay on the central coast of New South Wales. He was reading a book when he happened to glance up into the sky. The witness swears that absolutely nothing made him look up, his eyes were just tired from reading. He remembers thinking how clear the sky was on that day.

Looking to the southwest, he saw a distinct "red arrowhead" moving from the southwest to the northwest. He watched it for several minutes and established beyond doubt that it was moving. Often, there are brilliant sunsets in that area and the witness thought it could have something to do with light being reflected (through our atmosphere) from the sun. David Owen was, at the time, involved in UFO investigations and was aware of things people commonly mistake for UFOs.

The witness has a number of photographs of sunsets, so he decided to take one of this scene. He photographed the "arrowhead" and watched it until it faded, thinking no more of it until the photo was developed. A small INSTAMATIC camera was used, loaded with PACIFIC color film. The photograph was the last on the roll of film, negative number 12.

As the light faded, Owen went inside and checked the time. It was 4:07 p.m. (1607 hrs.). The center of

the light, when he first saw it, was approximately 30 degrees from the horizon, coming from the southwest. When it faded from view, it was approximately 50 degrees from the horizon, climbing to the northwest. The two outer "tails" of the arrowhead were about 30 degrees to 35 degrees apart.

No object was visible at any time. Apart from the original photograph, nine other enlargements were printed by a professional photographer, all with different colors. The camera was also checked, along with the negative. This careful investigation revealed that this was not a double exposure, nor was it Venus, another planet, gas, a weather balloon, clouds, aircraft or any other known phenomenon. The professional photographer who examined the negative and camera stated that the object which was not seen, but which developed with the photograph, appeared to be solid, with either a light in the front or the sun reflecting from its surface.

David Owen, who has lived at his sighting address for ten years, was in the Army for three years, 2½ of which was with the S.A.S., including twelve months on active service in South Vietnam where he gained considerable experience with aircraft.

Subsequent investigation of this incident by the Royal Australian Air Force revealed that no military aircraft were in the vicinity at the time of the sighting. Neither were any civil aircraft known to be there. The observer's location was Latitude: 3330S by Longitude 15130E.

This report was written and sent to us by Harry Griesberg, Co-Ordinator of the Australian Center for UFO Studies (P.O. Box 546, Gosford N.S.W., 2250 Australia). Mr. Griesberg had known the witness personally at the time of the photographic sighting for about two years. David Owen then was the President of the (now disbanded) Central Coast UFO Research Bureau.

(Continued on Page 2, Col. 2)

Correspondence

Dear Mr. Timmerman,

I am writing to thank you for the August 1980 issue of CUFOS ASSOCIATE NEWSLETTER...I consider it a surprise Christmas gift...

My second reason for writing is to send you the crude map of the sighting area that I made this past Thanksgiving holiday when my wife (the witness photographer) and I visited the scene of her experience on Cape Cod.

The thing that really impressed me was the very close proximity of the Cape Cod Power Plant, it being only a half mile from the location where my wife saw and photographed the object and arc of light.

The power plant is one of the largest man-made structures on the entire Cape and seems to dominate the relatively flat topography of the area...

Knowing the affinity UFOs seem to have for electrical sources such as power generating plants and high voltage transmissions lines, I thought this would be worth mentioning to CUFOS...

Sincerely yours,
Robert Garbaskas

Editor:

Regarding the "cone-shaped UFO photographed in Argentina," (December 1980 ASSOCIATE NEWSLETTER), I would like to point out an incongruity:

The CUFOS ASSOCIATE NEWSLETTER is published by the Center for UFO Studies, Evanston, Illinois, and is mailed monthly to financial contributors to CUFOS according to the schedule of ASSOCIATES. Copyright 1981 by the Center for UFO Studies and mailed as Third Class Mail at Lima, Ohio.

The contents of the CUFOS ASSOCIATE NEWSLETTER are determined by the editor and do not necessarily represent the official position of CUFOS, or reflect the opinions of the editor, the staff or the Center for UFO Studies.

Permission is hereby granted to quote from this issue provided not more than 200 words are quoted from any one article, the author of the article is given credit and the statement "Copyright 1981 by the Center for UFO Studies," is included in the quotation.

ISSN.# 0273-3129

The CUFOS ASSOCIATE NEWSLETTER
P.O. Box 1621
Lima, Ohio 45802
John P. Timmerman, Editor
J. Allen Hynek, PhD., Scientific Director

The witness described the appearance of the UFO as dark gray, whereas the photo shows it as pitch black. As explanation "a source of energy or a field next to the UFO" is suggested. This suggestion overlooks the fact that the only way something can appear black on a photographic print is the absence of any radiation which could affect the negative. Appearing dark gray to the witness implies that there was indeed some radiation in the visible part of the spectrum, which simply has to affect the photographic emulsion, which, too, is sensitive in the visible part of the spectrum. No matter what additional source of energy or force field may have been present, this darkening effect on the emulsion (and hence brightening effect on the print) couldn't have been reversed. In short, it is a physical impossibility that an object, which is dark gray to the eye appears pitch black on a photo.

Maybe, I'm missing something or my argument is wrong. Please, could you enlighten me in this case?

Sincerely yours,
Johannaes Koch
Hong Kong

Careful inspection of the best copy on hand shows that the base of the "cone-shaped object" is, indeed, slightly gray and not "pitch black," as our published copy appears to be. The printing process has modified the evidence and for this we apologize. We are inclined to regard the base as gray, as is described by the witness in the article. However, the base could appear black on the photo but gray to the eye if the object were emitting light within the violet and ultra-violet range. Editor & Dr. Hynek ☐

Unfortunately, about six months after the sighting David Owen informed Mr. Griesberg that he had lost the negative, accidentally burning it with other papers in a backyard incinerator. CUFOS has been advised that in December of that same year (1972) a photograph was taken in Hamburg, West Germany, of an identical object, also showing a red "arrowhead", but we have been unable to trace details for verification and comparison. Anyone familiar with this Hamburg photograph is urged to contact CUFOS or ACUFOS. ☐

We Goofed... Did You Catch It?

Unintentionally, in the cover article in last month's NEWSLETTER a rather significant error was made. The printer overlooked a change in the positions of the two similar photographs and...you guessed it...Dr. Hynek's photograph is the one on the right (not the left, as printed).

Therefore, if you compared the photographs with your copy of THE UFO EXPERIENCE and noticed the error, consider yourself a careful reader and good investigator material. But, be honest. Did you REALLY notice the error?

Editor

Anomalous Phenomena Society Of America Recently Founded

Consistent with the growing general interest and concern regarding observed variations from the expected behavior of some of our environment, a new scientific society, named the Anomalous Phenomena Society of America, has been founded. It is designed to provide a forum for curious and open-minded men and women of the scientific and academic communities who hold tenure appointments in major universities and who have a major interest in the promotion of studies which will "hopefully establish whether any so-called anomalous phenomena are real, and, if so, their true nature."

Peter Sturrock, Professor of Space Science and Astrophysics in the Institute for Plasma Research at Stanford University, is the founder. Among the fifty invited to become "founding members" are George O. Abell, Chairman, Department of Astronomy, University of California at Los Angeles; Bart J. Bok, Professor Emeritus of Astronomy, Steward Observatory, University of Arizona at Tucson; Thomas Gold, Director, Center for Radio-physics and Space Research, Cornell University and J. Allen Hynek, Professor Emeritus of Astronomy, Scientific Director, Center for UFO Studies. ☐

McCall's Article Produces Response

In the February issue of McCall's Magazine is an article by free-lance writer Richard Wolkomir entitled *Close Encounters In New Hampshire*. At the end of his interesting article, Mr. Wolkomir mentions the Center or UFO Studies and lists our address and telephone number for reporting sightings.

We have had a significant increase in calls and correspondence as a result of the article. Not everyone reads McCall's, but apparently many people do. Mr. Giglio promised in a telephone conversation to make available his photography for examination. We have not yet received it. If and when we do, we will report to you our findings. □

Dr. Hynek's Schedule of Appearances

You or an interested friend of yours may be near one of these locations. If so, this information is provided so that you may possibly attend and visit personally with him. If you are nearby, your assistance to the local committee will be greatly appreciated.

February 14 - Indiana Chapter, National Science Teachers Association Meeting, Stauffer Inn, Indianapolis, 1 p.m.

March 2 - University of Wisconsin, Stevens Point, Wisconsin, evening

March 3 - University of Alabama, Tuscaloosa (University), Alabama, evening

March 4 - Clemson College, Calhoun, South Carolina, evening

March 5 - University of Miami, Coral Gables, Florida, evening

March 21 - Northridge Shopping Center, Milwaukee, Wisconsin, afternoon

March 25 - Indiana Bankers Association, Michigan City, Indiana

April 3 - North Texas State University, Denton, Texas, evening □

Editorial...

We are moving...and, in the process, we are expanding our operations to a broader base...effective March 1, 1981.

Because of the increasing costs of maintaining a rented office and paid personnel, we are shifting gears at CUFOS. Before the end of February, we will move into no-rent quarters and will shift to volunteer personnel for the entire organization. We regret that the tight economy is forcing us to do this, but we believe we will, in the long run, strengthen the organization and bring a larger number of highly-qualified volunteers into more active participation with UFO research and education through the Center for UFO Studies.

Beginning March 1, 1981, you will have two addresses for CUFOS. All correspondence to Dr. Hynek or to Mimi Hynek relating to research, case investigation or Center Information Services publication (our editorial offices) should be sent to CUFOS, P.O. Box 1402, Evanston, Illinois 60204.

The second address is a new one and is for all correspondence relating to the ASSOCIATE NEWSLETTER, the ASSOCIATE program, financial matters and routine business activities of CUFOS. The new address is CUFOS, P.O. Box 1621, Lima, Ohio 45802 and will be the center of activities for John Timmerman, the Editor of this publication, the Treasurer and the Chairman of CUFOS.

Don't worry about sending something to the wrong office. We will be interchanging information by forwarding mail on a daily basis and there will be little delay if you send something to Dr. Hynek which should have been sent to the business office in Lima, or visa versa.

All CUFOS periodicals will continue to be published. These are the CUFOS ASSOCIATE NEWSLETTER (monthly) and the CUFOS BULLETIN (quarterly) which are mailed to contributing ASSOCIATES only, the CUFOS INVESTIGATORS QUARTERLY which is mailed to field investigators only, the FRONTIERS OF SCIENCE (bi-monthly) which is mailed to some ASSOCIATES or by subscription, the JOURNAL OF UFO STUDIES which is mailed to some ASSOCIATES or by subscription, plus others now in the planning stages.

Dr. Hynek will take over the investigative and editorial work of Allan Hendry, writing the BULLETIN and the IUR section of FRONTIERS OF SCIENCE. John Timmerman will continue to produce the ASSOCIATE NEWSLETTER, mailing it from Lima, Ohio and maintaining all ASSOCIATE records and a new computerized system for communications throughout the organization. Work previously performed by Estelle Postol in Evanston will be divided between the Evanston and the Lima offices with the assistance of volunteers in both locations.

For those who do not recognize the title, FRONTIERS OF SCIENCE is a new magazine owned by Center for UFO Studies which merges what were previously published as SECOND LOOK and INTERNATIONAL UFO REPORTER. It is edited by Elizabeth Philip and all matters relating to that magazine, including subscriptions, should be addressed to her at 8 E. Street, S.E., Washington, D.C. 20003.

Other special services of CUFOS will be announced in future editions of this NEWSLETTER, so watch for them.

With these changes, it is our intention to redirect the application of funds less to administrative expense and more to research and educational services. We will make every effort to avoid inconvenience for any of you. Thank you very much for your cooperation and assistance by remaining a participating ASSOCIATE of the Center for UFO Studies.

Editor

May Meetings In Arkansas Scheduled

Four one-week seminars are planned for the month of May near Salem, Arkansas. They are sponsored by the Association for Spiritual Development and Research, Inc., a non-denominational church lead by Reverend Elizabeth Nachman.

Dr. Hynek will be the weekly speaker for the session on UFOs and a weekly workshop on the subject of UFOs will be conducted each Friday during May by Lawrence Fawcett, CUFOS ASSOCIATE/DIRECTOR and Field Investigator from Connecticut with the assistance of John P. Timmerman, CUFOS Chairman.

The CUFOS UFO PHOTOGRAPHY EXHIBIT will be on display through the month of May at these weekly seminars and speakers on other subjects are scheduled for other days each week. Persons interested in attending one of these seminars should write to Patricia S. Bugg, P.O. Box 8, Salem, Arkansas 72576. □

Dr. Haines Speaks In California On Observing UFOs

The Human Factors Society is a national, professional association of scientists, engineers, and others who work toward the application of scientific knowledge to man's workplace. The human factor has become recognized as a central part of the design of any new system that involves humans in some way.

Seeking presentations on new and challenging areas of science for their 1980 National Convention, the program chairman invited Dr. Richard Haines to give a talk on "Observing UFOs." His presentation, given within a Forum Session entitled **Provocative Potentials and Unexplained Phenomena**, dealt with a general overview of the statistical facts of UFOlogy, but dwelt mainly on a challenge for the audience to become actively involved in UFO studies in their own disciplinary fields.

A call was made for engineers, chemists, physicists, astronomers, psychologists, sociologists, and other disciplines to work together to discover the core nature of the phenomenon. □

Cufos - Mufon Cooperation Expanding

"The Center for UFO Studies (CUFOS) and the Mutual UFO Network (MUFON) have been working as a team since 1973 when Dr. Hynek first announced the formation of the Center on the Dick Cavett TV Program."

Thus, Walt Andrus, Director of MUFON, introduces comments about our mutual desire to expand the cooperative relationship between the two organizations in order to increase our efficiency and effectiveness in the field of UFO research. In his "Director's Message" in the current issue of the MUFON UFO JOURNAL, Mr. Andrus itemizes some of the ideas under various states of implementation.

CUFOS plans to share weekly sighting log summaries with MUFON. CUFOS proposes to provide copies of the *Cufos Investigators' Quarterly (CIQ)* with MUFON field investigators. MUFON will encourage all investigators on its list to complete Form 2, attaching it to Form 1 when submitting UFO sighting reports. MUFON will forward Form 2 to CUFOS for tabulation and listing in UFOCAT. Speakers from each organization have been and will continue to be a part of the conference/symposium program of the other.

These preliminary steps toward greater cooperation between CUFOS and MUFON may begin a broader movement among all UFO research organizations to share and exchange important information on this subject. Eventually, together we may be able to convince the general public that the UFO phenomena that have been and continue to be experienced deserve serious scientific attention. □

Conference Announcement

Since the first conference on the state of UFO research sponsored by the CENTER FOR UFO STUDIES in 1976, many people have requested that another such event be held. Accordingly, a SECOND CUFOS CONFERENCE will be convened later this year. The conference will be held at a hotel (to be announced) in the Chicago area on September 25, 26, and 27, 1981.

This conference will be devoted to the scientific examination of the UFO phenomenon. It will be a forum where the most recent and productive research in the field can be presented and discussed. All papers to be presented will be refereed by members of the CUFOS Scientific Board and approximately one hour will be allotted for each presentation.

All ASSOCIATES of CUFOS are invited to attend this conference. However, two points should be kept in mind regarding attendance. One, the conference will be on a technical and advanced level. Papers to be presented will not be designed for the general public. Second, since space is limited, some priority must be given to active researchers in the field. With these caveats in mind, we welcome your attendance and participation. Information regarding meeting details and registration procedures and fee will be published in a future issue of the CUFOS ASSOCIATE NEWSLETTER. The registration fee for speakers will be waived.

If you care to submit a paper for possible presentation, we encourage you to submit the full paper, if possible; if not, abstracts of at least 200 words are acceptable. Papers may be submitted on any topic related to the UFO phenomenon, but preference will be given to those papers that describe original research. The deadline for submission of papers is June 30, 1981. For those of you who cannot attend the conference, it is expected that the Center will publish a PROCEEDINGS of the conference after its conclusion.

Please contact Mark Rodeghier through the CUFOS office if you have any questions or comments regarding the conference. We hope to see as many of our ASSOCIATES as possible at this September conference and encourage you to make an early decision to facilitate an early completion of our plans for the event.

UFO Report From China

The following sighting report, translated by Lin Man Yun dated October 16, 1980, was sent to us by correspondent Paul Dong. In the interest of consistent reporting, we present here the English version edited by Richard Hall in the current MUFON UFO JOURNAL.

Letter from Mr. Chow Ching Tung, who is a crew member of a certain unit of the Chinese Air Force:

The press reported the flying saucer case which took place in Australia on 21 October 1978. A 20-year-old pilot reported that a large elongated object flashing with green lights circled in the sky above the airplane he was flying and a few seconds thereafter, he and his plane were missing.

The second day after this case, it was on Monday 23 October 1978 we also sighted a very peculiar phenomenon. Our Force is stationed in a certain airport of Kansu Province. Our Main Group crew members together with several hundred people in the airport were watching a film show in the open-field square. A few minutes after the film show, at 20 hours and 4 minutes, the whole audience in sudden amazement was looking at the sky and talking to each other, expressing puzzlement, surprise, and alarm.

At that time, the sky was fine — cloudless and windless — with stars spreading over the sky. When I looked up, I saw a peculiar big object moving from eastward to westward, from about 60 degrees angle to overhead. After about 2-3 minutes, it was obstructed by a house at 60 meters distance to the west and could not be sighted any more.

This object was very prominent. It had two searchlight-like white lights directed forward and another light at the back. The light beams illuminated what seemed to be smoke or cloud near the object. Its speed was not fast; it was marching ahead in a straight line. The object was huge. It occupied a visual angle of 30-35 degrees. It looked as if it had a very big object in its center, but this could not be sighted clearly. It was not a falling star, nor locusts or birds.

The CENTER FOR UFO STUDIES was founded in 1973 as a not-for-profit educational and scientific research organization for the study of the general class of phenomena known as the unidentified flying objects. The CENTER has become an international clearing-house for the exchange and investigation of UFO sighting reports and a major source of reliable information about UFOs for school libraries, local study groups and the general public.

Funding for all CENTER activities is derived solely from interested individuals and private organizations. All such contributions are tax-deductible and a schedule for ASSOCIATE financial participation is included here. ASSOCIATES of the CENTER receive various publications, including a monthly newsletter, a quarterly bulletin, a semi-annual journal and other special mailings, according to the level of associate participation.

The CENTER operates a toll-free telephone number available to law enforcement agencies and scientific organizations for the transmission of sighting reports. The public telephone number is (312) 491-6666 and it is available to pre-paid calls on a 24-hour basis.

All reports coming to the CENTER are carefully evaluated for investigation, such investigation often involving highly technical laboratory and

It was surely not an airplane; we are all air force fighter personnel so this can be definitely established. It was not very high, estimated at about 6,000 to 8,000 meters. It was a very peculiar phenomenon, something never sighted before. A few days later, we all were still talking about it. If we had had a camera to take a photo, it would have been marvelous. Someone said: "It was a pity. It was quite possible that it was a flying saucer." Thereafter we watched the newspaper carefully for a report, but none appeared. Thousands of us personally sighted the same phenomenon. ☐

field tests. If the report cannot then be explained in terms of a misperception of an ordinary object or phenomenon, it is filed for statistical study into the CENTER'S computer bank, which now contains over 100,000 entries.

For person wishing information about the subject of UFOs, the CENTER maintains an extensive library at its offices in Evanston, Illinois, distributes its various publications, offers recommended publications of the CENTER and others through its Information Services office, distributes to broadcasting stations throughout the country pre-recorded public service messages, maintains a speakers bureau and is searching for additional ways to accomplish this purpose.

Nocturnal Light In Ohio

TYPE: LN

DATE: 12-13-80

TIME: 5:47 PM

DURATION: 1-½ to 2 minutes

WITNESSES: 1

PLACE: Lima, Ohio

James Garrigus, a 30 year old salesman, had barely started driving home from his parents' house when an orange glow to his left caught his eye. Moving downward at a 30° angle in the northeast, the light source was oblong and horizontally oriented. This glow was distinctly outlined, ¼ the size of a full moon. The intense orange light seemed to pulsate across the surface in a way that suggested the rotation of energy around it. Twice the witness had to avert his eyes from the light's intensity.

The form continued to drop until it suddenly curved back up again in a backwards "J". It exhibited these confined motions as it continued to proceed further northeast. The witness (who had stopped his car to watch this) tried to follow it. The light increased its speed, still bobbing and spinning. After 3-4 blocks of pursuit, with the form seemingly one block away, Garrigus watched the light bob one last time and shoot off along his line of vision upward at an 85° angle. No sound was ever heard, even when the witness stuck his head out the window to make sure it wasn't just a reflection. The sky, though dusky dark, was clear, the stars not yet visible.

Checks were made with the local

airport, and the Cleveland and Indianapolis Air Route Traffic Control Centers with no success at pinning down a cause for the peculiar sight. No other reports from the area are known.

Youths Link Pain With UFO

TYPE: NL (CES?)

DATE: 12-5-80

TIME: 10 PM

DURATION: 1 Hour

WITNESSES: 2

PLACE: Normal, IL

A 16 year old high school student and his 15 year old girlfriend (names on file at CUFOS) parked next to a swimming pool in a subdivision. While conversing, they noted a bright white light about 20-25° up in the western sky. The light, guessed by both witnesses to be about half the size of a full moon, was the only light they could see in the hazy, overcast sky. No stars were visible. It looked to be too low for a plane, too high for a tower.

Then the stationary light split into two smaller halves and rejoined again. The light would grow small and fuzzy, then brighten and enlarge. Three small lights shot out from the main source a limited distance and snapped back in again. The girl claimed to have seen a small red light blinking, while the boy noted a beam of light from the main light to one of the smaller ones.

Suddenly, in the last fifteen minutes of this extended observation, the witnesses ears began to hurt

simultaneously, especially their right ears. This pain shifted from their ears to their temples, her right and his left. Holding the site of the sharp pain, each witness felt a pea-size lump under the skin, but no discoloration.

Scared, they returned to the girl's house and told their story to her mother. She proved to be skeptical of the whole affair, but the boy's mother took it more seriously. The next day, the lumps were gone, but they had headaches.

The following Monday, the boy went out to the same spot alone, and spotted the light again at 8:45 p.m. He tried to drive closer to the source, but the light disappeared from view. As he swung his car around, the light reappeared. He only watched it for about a minute this time, then rushed home to tell his mother. When he called his girlfriend at 10 p.m. to inform her, both of them regained the painful lumps in their temples again (!).

Could the UFO have been a misperceived astronomical target, or a tower light? Dr. Carl Wenning, Illinois State University's planetarium director, accompanied the boy to the site on an evening that was clearer than before. No likely candidates for the previous light could be spotted, despite its previous longevity. Meanwhile, the young couple have claimed a variety of odd aftereffects as a consequence of their experience: sleepwalking, sleeptalking, and sensitivity to people's thought before they are spoken out loud. □
